KIDS activity has been conducted by department of physics dated 6th March 2020. Under this activity, B.Sc. III students of physics department have demonstrated various small scientific experiments to primary school students. Then Students and teachers have explained science behind these experiments in a very lucid language. Along with this, they also have given information about various daily experiences and science behind them. The students realized that behind every situation or incidence there is some reason or science. Nothing happens by magic in the universe.

The children of primary schools listened programs carefully, they fascinated towards Science. They wholehearted observed and involved in these programs. Also they were eagerly participated in experiments. During year 2019-20, two faculties and 8 students of B.Sc. III Physics participated in KIDS activity. The total beneficiaries of year 2019-20 are 26 children from Zila Parishad School No.3 Ramanandnagar (Burli).

One of the salient activities of the department, KIDS is implemented through the students of the department. The first and foremost objective of the scheme is to sow impetus towards learning in the minds of the probable ‘drop-outs’ from education system.

### Objectives

1. To develop the scientific temper, humanism and the spirit of inquiry and reform amongst students (focused) from childhood.
2. To create the sense of ‘Payback to society’ among college students.
3. It is one of the ways of superstition eradication

**Beneficiaries- 26**

- Third year physics Students demonstrating experiments to primary school students
- KIDS participants with Z.P. school students
