The Research score for research papers would be augmented as follows:

Peer-Reviewed or UGC-listed Journals (Impact factor to be determined as per Thomson Reuters list) :

- i) Paper in refereed journals without impact factor - 5 Points
 - ii) Paper with impact factor less than 1 - 10 Points
 - iii) Paper with impact factor between 1 and 2 - 15 Points
 - iv) Paper with impact factor between 2 and 5 - 20 Points
 - v) Paper with impact factor between 5 and 10 - 25 Points
 - vi) Paper with impact factor >10 - 30 Points
- a) Two authors: 70% of total value of publication for each author.
 - b) More than two authors: 70% of total value of publication for the First/Principal/Corresponding author and 30% of total value of publication for each of the joint authors.

Joint Projects: Principal Investigator and Co-investigator would get 50% each.

Note:

- Paper presented if part of edited book or proceeding then it can be claimed only once.
- For joint supervision of research students, the formula shall be 70% of the total score for Supervisor and Co-supervisor. Supervisor and Co-supervisor, both shall get 7 marks each.
- *For the purpose of calculating research score of the teacher, the combined research score from the categories of 5(b). Policy Document and 6. Invited lectures/Resource Person/Paper presentation shall have an upper capping of thirty percent of the total research score of the teacher concerned.
- The research score shall be from the minimum of three categories out of six categories.

Over the last decade, remarkable progress has been made in our understanding the phytohormones, cytokinin's (CKs) biosynthesis, perception, and signalling pathways. Additionally, it became apparent that interfering with any of these steps has a significant effect on all stages of plant growth and development. As a result of their complex regulatory and cross-talk interactions with other hormones and signalling networks, they influence and control a wide range of biological activities, from cellular to organismal levels. In agriculture, CKs are extensively used for yield improvement and management because of their wide-ranging effects on plant growth, development and physiology. One of the primary targets in this regard is cytokinin oxidase/dehydrogenase (CKO/CKX), which is encoded by CKX gene, which catalyses the irreversible degradation of cytokinin. The previous studies on various agronomically important crops indicated that plant breeders have targeted CKX directly. In recent years, prokaryotic clustered regularly interspaced short palindromic repeats (CRISPR)/CRISPR-associated protein 9 (Cas9) system has been increasingly used in editing the CKO/CKX gene and phenomenal results have been achieved. This review provides an updated information on the applications of CRISPR-based gene-editing tools in manipulating cytokinin metabolism at the genetic level for yield improvement. Furthermore, we summarized the current developments of RNP-mediated DNA/transgene-free genomic editing of plants which would broaden the application of this technology. The current review will advance our understanding of cytokinins and their role in sustainably increase crop production through CRISPR/Cas genome editing tool.

The discipline 'urban ethnopharmacology' emerged as a collection of traditional knowledge, ancient civilizations, history and folklore being circulated since generations, usage of botanical products, palaeobotany and agronomy. Non-traditional botanical knowledge increases the availability of healthcare and other essential products to the underprivileged masses. Intercultural medicine essentially involves 'practices in healthcare that bridge indigenous medicine and western medicine, where both are considered as complementary'. A unique aspect of urban ethnopharmacology is its pluricultural character. Plant medicine blossomed due to intercultural interactions and has its roots in major anthropological events of the past. Unani medicine was developed by Khalif Harun Al Rashid and Khalif Al Mansur by translating Greek and Sanskrit works. Similarly, Indo-Aryan migration led to the development of Vedic culture, which product is Ayurveda. Greek medicine reached its summit when it travelled to Egypt. In the past few decades, ethnobotanical field studies proliferated, especially in the developed countries to cope with the increasing demands of population expansion. At the same time, sacred groves continued to be an important method of conservation across several cultures even in the urban aspect. Lack of scientific research, validating the efficiency, messy applications, biopiracy and slower results are the main constraints to limit its acceptability. Access to resources and benefit sharing may be considered as a potential solution. Indigenous communities can copyright their traditional formulations and then can collaborate with companies, who have to provide the original inventors with a fair share of the profits since a significant portion of the health economy is generated by herbal medicine. Search string included the terms 'Urban' + 'Ethnopharmacology', which was searched in Google Scholar to retrieve the relevant literature. The present review aims to critically analyse the global concept of urban ethnopharmacology with the inherent plurality of the cross-cultural adaptations of medicinal plant use by urban people across the world.

ABSTRACT

Monoamine oxidase (MAO) is capable of catalysing the oxidative deamination of amines and neurotransmitters. MAO plays a pivotal role in maintaining neurotransmitters linked to neurological disorders viz. Alzheimer's disease (AD), Parkinson's disease (PD) etc. Therefore, inhibition of MAO can be implicated to the cure of such diseases. Synthetic MAO inhibitors are known to inhibit MAO activity. However, there are safety issues with synthetic MAO inhibitors and many of their effects are non-selective and irreversible. Contrasting synthetic drugs, plant-derived natural products have been popularized globally owing to their extensive acceptability and applicability, therapeutic potency and minimum side effects which potentiated the possibility of developing reversible, promising MAO inhibitors based on natural products. The present review comprehensively elucidates plant-derived natural reversible MAO inhibitors using the literature from the popular databases such as Google Scholar, Scopus, PubMed and Web of Science. This literature review reports approximately 51 plants that have been evaluated for MAO inhibitory activity. In addition, 93 plant-derived natural compounds were retrieved as MAO inhibitors. Majority of these investigations predominantly utilized an *in vitro* approach to evaluate the MAO inhibitors in relation to the developing treatments of related neurological diseases. However, *in vivo* studies and clinical trials are still lacking in evaluating the botanical-

Abstract

Bacopa monnieri (L.) Wettst. or water hyssop commonly known as "Brahmi" is a small, creeping, succulent herb from the *Plantaginaceae* family. It is popularly employed in Ayurvedic medicine as a nerve tonic to improve memory and cognition. Of late, this plant has been reported extensively for its pharmacologically active phyto constituents. The main phytochemicals are brahmine, alkaloids, berberine, and saponins. The saponins include bacoside A, bacoside B, and betulinic acid. Investigation into the pharmacological effect of this plant has thrived lately, encouraging its neuroprotective and memory supporting capacity among others. Besides, it possesses many other therapeutic activities like antimicrobial, antioxidant, anti-inflammatory, gastroprotective properties, etc. Because of its multipurpose therapeutic potential, it is overexploited owing to the prioritization of natural remedies over conventional ones, which compels us to conserve them. *B. monnieri* is confronting the danger of extinction from its natural habitat as it is a major cultivated medico-botanical and seed propagation is restricted due to less seed availability and viability. The ever-increasing demand for the plant can be dealt with mass propagation through plant tissue culture strategy. Micropropagation utilizing axillary meristems as well as *de novo* organogenesis have been widely investigated in this plant which has also been explored for its conservation and production of different types of secondary metabolites. Diverse *in vitro* methods such as organogenesis, cell suspension, and callus cultures have been accounted for with the aim of production and/or enhancement of bacosides. Direct shoot-organogenesis was initiated in excised leaf and internodal explants without any exogenous plant growth regulator(s) (PGRs), and the induction rate was improved when exogenous cytokinins and other supplements were used. Moreover, biotechnological toolkits like *Agrobacterium*-mediated transformation and the use of mutagens have been reported. Besides, the molecular marker-based studies demonstrated the clonal fidelity among the natural and *in vitro* generated plantlets also elucidating the inherent diversity among the natural populations. *Agrobacterium*-mediated transformation system was mostly employed to optimize bacoside biosynthesis and heterologous expression of other genes. The present review aims at depicting the recent research outcomes of *in vitro* studies performed on *B. monnieri* which include root and shoot organogenesis, callus induction, somatic embryogenesis, production of secondary metabolites by *in vitro* propagation, acclimatization of the *in vitro* raised plantlets, genetic transformation, and molecular marker-based studies of clonal fidelity.

ABSTRACT:

Present study was conducted in Barshi, Karmala, Malshiras, Mohol, Phandarpur, Mangalwedha and Sangola Tehsils, to understand the diversity of herpatofauna from Solapur district of Maharashtra, India. Present study was conducted during January, 2019 to March 2022. Appropriate scientific methods such as pitfall trap method and Visual encounter method were adopted to enumerate the herpatofaunal diversity from the study region. In this study, we have recorded a total of nine amphibian species belonging to three families and one order, and thirty-six species of reptilians belonging to sixteen families and one order were recorded from the study region.

Amphibians commonly use wetlands for breeding habitat, and given the concern about their ongoing global declines, the effects of urbanization on the breeding distribution of amphibians need to be quantified. Wetlands in urban areas had less surrounding forest and wetlands and greater road density than rural wetlands. Urbanization was also associated with increases in hydroperiod (i.e. Wetland permanency) and the presence of fish predators. Moreover, urban wetlands had lower larval amphibian species richness than rural wetlands. This decrease in richness was attributable to a decrease in occurrence of wood frogs (*Rana tigrina*)

Portrayal of Motherhood in Meena Alexander's Poetry

Ujwala Vijay Patil

Associate Professor Department of English Dr.Patangrao Kadam Mhavidyalaya
Ramanandnagar(Burli) Sangli 416308(MS) India

Abstract

The feminist consciousness of Meena Alexander is typical Indian and has its indigenous origin rooted in the oppression of women. The women has two extremely opposite images either as 'devi' the incarnation of virtue, devoid of all emotions and deprived of sexual and

family relations like Sita and Savitri or the 'demonic', the villain, the monster full of all evils, allowing no humanity for herself. The awareness of the repression of the self and oppression of women in patriarchal society makes Alexander to ask in her autobiography *Fault Lines*, If you want me to live as a woman, why educate me? Why not kill me if you want to dictate my life? God, why teach me to write? So in order to subvert the traps of male domination, the poet reclaims the matrilineal tradition of India and celebrates it through her poems. Poet longs for gender free existence of women; however it is the 'utopian' desire. Still her poems encourage the concept of new woman aware of her own 'self'. She tries to negotiate the barrier of gender and the preserves matrilineal connection as a medium of establishing her new feminist identity by speaking about her matrilineal bloodline.

KEYWORDS: Matrilineal tradition, patriarchy, feminism, motherhood, gender

Julia Kristeva, in her *Desire in Language* describes a mother-centred realm of expression as the semiotic opposed to the symbolic law of the father. Kristeva rejects the psychoanalytic theorizing of motherhood as the model for psychic health. She observes, "A mother is a continuous separation, a division of the very flesh". For her experience of giving birth "wounds but increases" resulting in "the calm of another life, the life that other who wends his way while I remain henceforth like framework" (Kristeva178). Keeping in line with these radical feminists, Meena Alexander describes the relationship between mother and child ironically, "Before that script was set the child was born / but by that script the woman is torn" ('Text from the Middle Earth' IRMN29).

The lives of women have been controlled and manipulated by patriarchy in all cultures, all nations and all ages by setting various norms, values, roles of gender perception and idealism to 'make a woman'. Then the motherhood also becomes kind of imposition as Adrienne Rich writes in *Of Woman Born*, "Though motherhood is the experience of women, the institution of motherhood is under male control This glorious motherhood imposed on women conditions her entire life" (Rich45).

Though childbirth and reproduction has been considered as reason of women's exploitation, Alexander's poetry captures the pangs of waiting motherhood, the joy of being pregnant and a perfect female experience of a body cupping a body and introduces the fourth generation in her poetry. In an interview with Ayisha Abraham, Alexander said

ABSTRACT

Though multicultural society is highly egalitarian policy, the racial discrimination exists in it. When the 'other' cultures tend to be measured against 'dominant', they find themselves placed at the margins of the society. Multicultural society declares itself liberal towards immigrants irrespective of their nationality, religion, and race. However, the third world immigrants have to face the discrimination in subtle manner in various facets of their lives. To emphasize the hierarchization of power in Canadian multicultural mosaic, "multiculturalism" is ironically termed as "multivulturalism" in the novel No New Land (Vassanji 54). The racialized gaze is a thematic pattern that recurs with stress in Alexander's poetry. The poet's creativity is concerned about the cultural marks on the body of immigrant women. While living in gendered, racialized and "multicultural" space, the poet finds it difficult to define her Indian identity. Because race is "used almost synonymously with ethnicity, signifies a complicated imbrication of culture and nationality" (Banerjee 31). Alexander's poetry is a lively response to social and historical realities. The present paper tries to analyse this sense of being born in female and coloured body which is struggling to survive on physical and psychological level as an immigrant as expressed in Meena Alexander's poetry.

Keywords: Multiculturalism, Ethnicity, Culture, Racial Discrimination, Diaspora

Meena Alexander's poetry is a complex interweaving of the Indian and immigrant experiences. Her poetry emerges out of the consciousness of hanging between two worlds, between memory and present experiences. The issues of identity formation and retention are crucial for her. The racism, with reference to immigrant experience, has been more than just expression of hate. The racism evidences "prejudice based on the race, colour, ancestry, ethnicity, religion, or national origin of the victim" (Goldberg 17). It is also "an international postmodern bias based on artificially and scientifically vacuous distinction between biologically conceived racial group" (Goldberg 19).

Webster's dictionary defines race as "one of the major subdivisions of mankind, regarded as having a common origin and exhibiting a relatively constant set of physical traits" while racism is "An excessive and irrational belief in or advocacy of the superiority of

Structural Devices in the Poetry of Meena Alexander

Abstract

Meena Alexander was a poet of Indian diaspora born in 1951 and settled in America. She has tackled the questions of exile, race, gender, sexuality, violence, cultural differences, and multiple identities in her poems and novels. She makes use of her various cultural experiences and memories of the past to cope with present. Through an articulation of her multicolored experiences, she provides clue to her complex identity. However the present study aims at the structural devices in the poetry of Meena Alexander. She has more than ten collections of poetry to her credit. In fact the poetry is interpreted to specify the meanings of its language by analysis, paraphrasing and by commentary on the ambiguous and figurative stanzas. The poetry is interpreted in order to make clear the thematic patterns and technical features by the analysis of poetic devices, imagery, symbolism, and poetic diction. The close reading of the texts helps to analyze the poem in order to see how images, metaphors, poetic devices, poetic diction and symbolism form the poem and give particular meaning. The present paper focuses on structural devices in the poetry of Meena Alexander as hint or clue to the meaning.

Keywords: rhetorical figures, structural devices, sound devices, sense devices

The poet uses rhetorical figures that are some common figures of speech, which deviate or depart from the competent user's standard or literal uses of language. The thematic study is restricted to the study of what poem says, however, the study of techniques intends to understand how a poet expresses himself. According to L. G. Alexander, every poem is unique and has some special qualities of its own that are called as poetic devices. L.G. Alexander has classified poetic devices in three categories: structural, sense and sound. Structural devices include contrast, repetition, and illustration. Simile, metaphor, and personification are sense devices. Sound devices include alliteration, onomatopoeia, rhyme, assonance, rhythm. Except these three main devices, there are other devices, which are to be focused in the study. They are paradox, transliteration, allusions, synesthesia, apostrophe, voices, exaggeration (hyperbole), rhetorical questions, invocation, inversion, antithesis, parallelism.

Structural Devices:

a. Contrast

In order to accentuate the feelings of exile, alienation, lamentation, loneliness, devastation, pain, agony and loss, the poet uses the device of contrast very effectively in the poem *The Bird's Bright Ring*. The blind musician and the cactus man representing darkness and disappointment are contrastingly juxtaposed with Durga of many heads, smiling at flower and representative of feminine power (BBR 10). The contrast between frog and sun in the poem represents the conflict between the patriarchal male power and a weak female power with its physical limitations (BBR 16, 17). The poem is engulfed by darkness and blackness. Contrastingly, it is replete with description of light and brightness. The poem 'Pictures for the Bhagavatha Purana' (SR32) has contrast as the main device. The various pictures of the degeneration and degradation of values, oil fishing boat, a wooden stool, police station with broken windows, a mongrel, a boy with an extra thumb erect, women pouring water on the tomb are pictures of modern life. Contrastingly, enough the poet calls them as pictures for the Bhagavata Purana.

Delhi is the capital city of India and has historical importance and grace. However, the poem 'Threshold City' (SR 43) presents Delhi in all its degraded and polluted state in spite of its glorious and affluent heritage. Pigeons lurching in football fields, skies shot with acid focus the degenerated situation of Delhi and present the contrast of the situation. India is such a country where we can see the two extreme ends in social life. There are people who are extremely rich wallowing in luxuries and comfort while on the other hand poor people who cannot get enough food to fulfill their hunger. The poem 'The Travellers' portrays the pictures of poverty, black money, corruption in order to specify the contrast between the rich and poor very sarcastically (TS 9).

In poem 'Keeping House' (HoaTD 9) the description of Sabarmati ashram, ablutions and sung prayers, spinning wheels recounts the simple and peaceful way of life which is juxtaposed against the current situation of country where disorder dogs and people have become butchers to spin out the bloodied flesh in the nightmares. Poet expresses the hardships of exiled life through the device of contrast in 'Toxic Petals' (RaB). The exiled space makes poet faceless and selfless sucking up her reflection in a blue hole of sky, so she writes, "From where I sit / summer's blossoms are headless / tearing uphill" (RaB 71). In order

Meena Alexander was the prominent Indian diaspora poet. Her multiple migrations in childhood and final settling in USA has moulded her poetic sensibility. Alexander projects the voice of the subalterns and represents the history of the masses. Though living abroad, Alexander has not abandoned a revolutionary stance. She speaks of the class struggle and the class conflict through her poetry. The poet is the voice of marginalized subalterns and sings of them. The poet is more elaborate in describing her identification with the working class and have-nots. The sun is the symbol of feudal power and colonizers. She aligns with the Marxist idea and sings for the proletariat.

Meena Alexander was the prominent Indian diaspora poet. Her multiple migrations in childhood and final settling in USA has moulded her poetic sensibility. Alexander projects the voice of the subalterns and represents the history of the masses. Though living abroad, Alexander has not abandoned a revolutionary stance. She speaks of the class struggle and the class conflict through her poetry. She is a Keralite and spent some formative years at JNU. Therefore, she is influenced by leftist thought and sings for the working class in her poetry, "I sing for all those who work head bent / close against the great red sun" (BBR 15).

The poet is more elaborate in describing her identification with the working class and have-nots. The sun is the symbol of feudal power and colonizers. She aligns with the Marxist idea and sings for the proletariat, "For song being labour". The poem *The Bird's Bright Ring* has been full of sad and gloomy tone reflecting death, devaluation of values and suffering of masses as the major concerns for the poet. She hears the voices of suffering people from the depth of darkness and sorrow (BBR 23). The poem compares the birth of these people as 'endless devastation' and 'devastation of mortality', "Fragile as filament of an egg / Your birth / An endless devastation" (BBR 23).

When the poet was in Hyderabad, her office was just across the wall from a police station. During the Emergency, she could hear sounds and cries of prisoners who were being beaten. She wrote poems on it. The poet expresses sorrow on the sufferings of the prisoners in 'Within the Walls' (IRMN 17). The use of brutal force against disenfranchised victims of political oppression during the Emergency and its depiction in the poetry of Meena Alexander shows her understanding of the exploitation of masses by indigenous rulers. The nation brought up on the teaching of Mahatma Gandhi of non-violence and truth, has been tainted with violence and oppression of depressed classes and women. The common suffering people whom poet calls, "My People" are just "genitals of litter bearers" (IRMN 19). They carry sorrow from centuries and never know pleasure.

Concept of Structuralism: A Review

Abstract

According to structural critics, literary work cannot be understood in the isolation but it needs to be interpreted in the context of larger structures they are part of. Peter Barry writes in his Beginning Theory, "meaning or significance isn't a kind of core or essence inside things; rather meaning is always outside"(40) Meanings are not the core of the things but meanings are attributed to things by human mind. For example sonnet cannot be understood only as an individual poem but it needs to be explained in the context of tradition of sonnet. The structural approach takes us away from interpreting individual literary works and towards understanding the structures which contain those works. However those structures are abstract and not concrete specifics. That's why structural approach caused great controversy in Britain and USA. The so-called 'Cambridge revolution' in English Studies in 1920s had emphasized exactly opposite approach by giving emphasis on study of literary work in isolation and excluding wider questions, abstract issues and ideas. Thus structuralism had turned English studies upside down. The present paper tries to take review of concept of structuralism and the terms related to it.

Structuralism as an intellectual movement began in France in the 1950s. It was first seen in the works of anthropologists Claude Levi-Strauss and literary critic Roland Barthes. According to structural critics, literary work cannot be understood in the isolation but it needs to be interpreted in the context of larger structures they are part of. Peter Barry writes in his Beginning Theory, "meaning or significance isn't a kind of core or essence inside things; rather meaning is always outside"(40) Meanings are not the core of the things but meanings are attributed to things by human mind. For example sonnet cannot be understood only as an individual poem but it needs to be explained in the context of tradition of sonnet.

However those structures are abstract and not concrete specifics. That's why structural approach caused great controversy in Britain and USA. The so-called 'Cambridge revolution' in English Studies in 1920s had emphasized exactly opposite approach by giving emphasis on study of literary work in isolation and excluding wider questions, abstract issues and ideas. Thus structuralism had turned English studies upside down.

Structuralism has its roots in the thinking of Swiss linguist Ferdinand de Saussure. Instead of patterns and functions of language Saussure emphasized on how meanings are established and maintained and on functions of grammatical structures. It is essential to understand three pronouncements of Saussure to understand the interrelation between linguistic structures and structuralism. The first pronouncement is, meanings we give to words are totally arbitrary and that these meanings are maintained by convention only. There is no coherent relation between the object and the word it designates. The second pronouncement is, the meanings of words are relational. For example, meaning of night is related to day. The night cannot be explained without referring to day. Night means absence of day. The third pronouncement is, Language constitutes our world, it does not just record or label it. Peter Barry writes, "Meaning is always attributed to the object or idea by the human mind, and constructed by and expressed through language: it is not already contained within the thing."(44)

FEMINIST CONSCIOUSNESS AS CONSCIOUSNESS OF WOMEN'S VICTIMIZATION

Simone de Beauvoir observes about anatomy and inferior status of women in 'Introduction to *The Second Sex*':

Woman has ovaries, a uterus; these peculiarities imprison her in her subjectivity, circumscribe her within the limits of her own nature. It is often said that she thinks with her glands.

... He thinks of his body as a direct and normal connection with the world, ... whereas he regards the body of woman as a hindrance, a prison, weighed down by

Everything peculiar to it. 'The female is a female by a virtue of a certain lack of qualities,' said Aristotle, 'We should regard the female nature as afflicted with a natural

defectiveness'. (Beauvoir 43-44)

In every ideal social structure, woman holds a significant position as a better half of humanity but in reality, she is just lesser half. They are thought as inferior, other, lacking, and wrong. She has never been considered equal to man who is considered as norm, a human being, and the right being. Woman is always thought in terms of her anatomy. She is defined by limiting criteria, without reciprocity.

Feminism is a movement of modern women. It owes its emergence to such biased misconceptions and depressing images of women. These biases and misconceptions work for the subjugation of woman and protection of the interest of patriarchy and male domination. The term 'feminism' designates the movement for the protection of rights of women and implies correlations with the equal social, political, and economic rights of women with men. The term and movement became popular in 20th century with the western women's struggle for 'right for

Abstract:

The reading is one of the basic language skills and is generally classified as an important activity in the ELT classroom and outside also. In the twenty first century teaching and mastering English language has become more important than literature. English speaking has become pre-requisite for every profession. In such situation reading is the most useful to acquire communication skills. The reading of textbooks can be the useful tool for inculcating the habit of reading among the students learning English as second language. The present paper is based on a short experiment of reading text book for vocabulary development in ESL classroom. It is a kind of action research project which will help students to improve spoken English. In Action Research, "Action refers to intervention in an existing practice in particular social contexts (for example classroom and school) to bring about improvement and change, whereas 'research' involves the systematic observation and analysis of the change that occurs as a result" (Rui, Icy. 1). Action research is a distinctive research done by the teachers to improve their competency. According to Cohen and Manion, action research is done contextually to provide a solution to the current problem.

Origin of the Research Problem:

Reading aloud is a common practice in primary classrooms and is considered as useful tool for vocabulary development. Reading aloud is suggested for building oral language and means of developing vocabulary. Reading

exposes the reader to novel and unusual words and rich descriptive language. In the twenty first century teaching and mastering English language has become more important than literature. English speaking has become pre-requisite for every profession. In such situation reading text has to be used as
